

Agronomist (Polyhouse)

THE ROLE

Post	Agronomist (Polyhouse)
Company	A commercial polyhouse farm
Location	Niwai, Tonk, Rajasthan (stay on the farm)
Experience	2–3 years in commercial polyhouse cultivation; soil-based cucumber
Salary	Rs 30,000 a month
Openings	2

ABOUT THE JOB

A commercial polyhouse farm at Niwai (Tonk, Rajasthan) needs agronomists to look after 16 polyhouses growing cucumber in soil. The role is hands-on: daily rounds of every house, fertigation, nutrition and crop protection, a small team, and daily reporting to the CEO. The selected person lives in the house provided on the farm.

WHAT THE JOB INVOLVES

- Take full technical and day-to-day charge of 16 polyhouses (about 20 acres) growing cucumber in soil.
- Inspect every polyhouse in person daily: crop health, growth, flowering, fruit set, yield and quality.
- Run irrigation, fertigation, soil nutrition, EC/pH, and pest and disease control independently.
- Spot crop problems early and put corrective measures in place on time.
- Prepare daily, weekly and crop-cycle work schedules; supervise and train two agricultural assistants and farm workers.
- Keep daily records of crop condition, irrigation, fertiliser, sprays and production; send a daily report to the CEO and attend review meetings.
- Own production planning, yield, quality standards and overall technical farm management.

WHAT THEY WANT

- 2–3 years of hands-on experience in commercial polyhouse cultivation
- Proven expertise in soil-based cucumber under protected cultivation
- Has worked on commercial polyhouses with a farm team
- Strong in fertigation, irrigation, soil management, crop nutrition and pest/disease management
- Must live in the house provided inside the farm and work full time for this farm only
- Qualification: B.Sc. or M.Sc. (preferred) in Agriculture, Horticulture or a related field
